Beginning Friday, January 29<sup>th</sup>, DMD Consultants will begin inspection and maintenance on select fire hydrants in the City of Norman. There are approximately 80 fire hydrants within the City of Norman that will be inspected as part of a quality control initiative being funded by Clow, the manufacturer, in cities across the nation. The maintenance performed by the contractor will not require interruption of water service to residents or businesses. Each fire hydrant will be out of service for approximately 30 minutes while the inspection and maintenance is being performed. The Fire hydrants in the City of Norman are located in City easement so access to private property will not be necessary. The contractor should be easily identified by uniform and company vehicle. The work is expected to take 3 weeks to complete. If you have any questions you may contact the City of Norman Line Maintenance Division at 329-0703.
